The graph displays a periodic triangular wave (black line) and a red curve on a grid. The x-axis is marked by vertical dashed lines, and the y-axis is marked by horizontal solid lines. The triangular wave has a period of 2 units and a peak height of 1 unit. The red curve is a smooth, periodic function that follows the general shape of the triangular wave but with rounded peaks and troughs.

x	Triangular Wave (y)	Red Curve (y)

The graph displays a periodic triangular wave (sawtooth pattern) on a grid. The x-axis is marked with vertical dashed lines, and the y-axis is marked with horizontal solid lines. A red line, representing the function $f(x)$, is plotted below the wave. The red line is nearly horizontal, indicating a constant or nearly constant value across the domain shown.

The graph displays a function (blue line) and its Fourier series partial sums (gray lines). The function is a smooth, periodic wave. The partial sums are shown for various values of N , illustrating the Gibbs phenomenon near the discontinuities at $x=0$ and $x=9$. The x-axis is labeled from 0 to 9, and the y-axis is labeled from -1 to 1.
